

Situs and Mailing Address Quality Initiative

Impacted Data Advice Clients

Customers of weekly or monthly BC Assessment (BCA) data advice may notice increased activity on properties throughout the Province as BCA completes an initiative to ensure situs (civic address) and mailing address records are accurate.

Summary of BCA Quality Initiative

BCA will be updating approximately 33,500 situs postal codes this weekend (July 7th). This mass update of situs postal codes is part of BCA’s routine assessment data quality improvement to ensure we prioritize, and systematically address opportunities to improve upon BCA’s high standard of assessment roll quality.

A complete list of situs address records being updated can be found by [clicking here](#). The following table outlines the approximate number of situs addresses being updated per Assessment Region:
